

Low Priced Digirad® Preventive and Minor Maintenance Service Agreements

Includes 12 Months Online and Phone Support, and Free Repairs of Other Issues During your PM Visit

In facilities with reduced scanning schedules, a full service agreement may not be necessary. Our PM agreements give you the confidence of our full support all year, while meeting your accreditation requirements.

We now offer low cost Preventive Maintenance Agreements for Digirad® cameras in smaller facilities with low patient throughput. Digirad systems are extremely dependable with proper maintenance. We have the parts, supplies and technical skill needed to keep your Camera in excellent condition. Our PM agreements also include free repairs while onsite, unlimited telephone/online software support, and many high-failure items such as cooling fans, Keyboards, cables and ECG leads. Also, non-covered repair services are discounted 20% for our PM customers.
