

Gamma Systems Services Inc. introduces...

“Man That’s Wild”

Full Service Contracts at 35% Lower Cost

New Lower 2010 Pricing on Nuclear Medicine System Service Agreements

CMS reimbursements are being slashed. Technetium supplies are intermittent and more healthcare system changes are on the horizon... It's not business as usual.

We agree, and now it's time to take a different approach regarding gamma camera service pricing. So, we are now lowering service contract pricing on all mature systems.

If your facility has one or two gamma cameras, we can help. GSSi services smaller facilities with one or two SPECT systems. Our fast service response and low pricing has been vital for budget-conscious facilities to maintain their revenue stream. *Also, ask us about caring for the nuclear regulatory Health-Physics needs in your hot lab.*

Partial Systems List (call us for others)
